### **Testimonial from The FitzWimarc School**

CSS is a medium-term intervention where intensive support is offered to students with a view to them reintegrating back into mainstream education. The FitzWimarc School has an excellent working relationship with Steve Phillips and the whole CSS team. Our two organisations work very closely together and are mutually supportive in reintegrating students back into mainstream school. CSS are receptive to us referring students to them when that level of intervention is required for a student and their work with students is invaluable.

Steve Phillips takes an active role in local BAP meetings presenting data from the local schools and advocating for students who are ready for reintegration back into a mainstream school. All local schools work via the effective system of referrals into CSS to support the reintegration process with each school taking it in turn to support the return of a student to mainstream education. The work CSS do with the students is key as is their realistic and supportive approach to reintegration.

Robert Harris  
Headteacher
